

# High Twelve International Ambassador Program

---

## **Objective:**

The objective of the Ambassador Program is to encourage the clubs and members of High Twelve International to go beyond their clubs and visit lodges and concordant bodies and deliver the good news of the “High Twelve Glow.”

## **Program:**

Members will send in a form documenting their visit and presentation of High Twelve to lodges and concordant bodies. The form, which will be on the International Web Site, will be turned in after each presentation event or events. All submission must be submitted no later than two months before the annual convention. The form will list the presentation event(s) that were made to lodges and concordant bodies, the date of the event, the person making the event, the club they belong to and the Association their club belongs to. Independent clubs will be grouped into an independent category. The program will provide awards, called the “Ambassador Award”, for individuals and clubs who make to most effort in presenting High Twelve to the Masonic Family.

### ***Individual Award***

The first award is for the individual(s) with the largest number of presentation efforts. The individual award(s) will be a placard which the recipient(s) can display with pride in their homes. Certificates will be given to second and third place winners. Further, ever individual that turns in form would be awarded a small – inexpensive lapel pin.

### ***Club Awards***

The second award will take the individual forms and add the individual forms to a club level. The club with the largest number of presentation efforts will also receive an award. There will be two awards, one for the club with the largest absolute number and one for the highest average (total number divided by number of club members in the per capital bill). The second club award’s objective is to level the playing field for smaller Clubs.

### ***State Association Award***

The third award category club totals would be added to the state level. Similar to the club award a state association with the largest absolute number will receive an award. Further, a state association with the highest average (total number divided by number of state members in the per capital bill) will also receive an award. This would level the playing field for smaller states associations.

Since clubs and state associations do not have a physical location I am suggesting that the awards be patches, like the Wolcott patches, but twice the size. This would allow the winning clubs and state associations to attach their awards the side bars of their respective High Twelve Banners.
